DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-24, drawn to frame rate buffering, classified in class 375, subclass 240.02.
 - II. Claims 25-29 and 40, drawn to bandwidth allocation based on display commands over a distribution network for internet and TV channels, classified in class 709, subclass 226.
 - III. Claims 30-39, drawn to bandwidth allocation for transmission over a video cable network, classified in class 725, subclass 95.
 - IV. Claims 41-42, drawn to statistical multiplexing of plurality of compressed video streams, classified in class 348, subclass 423.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I to IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III and IV each has separate utility as noted in ¶ 1 above. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2613

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
